

Quick Wing

Fleet Management Software

Built to grow with your business
One product. One team. Any size of fleet.

How big can Quick Wing get?

Whether you have 60 vehicles in one location or 30,000 vehicles across 500 franchises, Quick Wing is built to grow with you. The same software you start with today is the same software a multi-national fleet uses tomorrow — it just runs on bigger, faster computers behind the scenes.

WHAT YOU GET FOR YOUR MONTHLY RUNNING COST

Each franchise listed below has **60 cars and 60 staff members**, all booking vehicles, logging mileage and pulling reports throughout the day.

SETUP LEVEL	FRANCHISES SUPPORTED (60 CARS + 60 STAFF EACH)	TOTAL CARS	TOTAL STAFF	APPROX. MONTHLY COST
Starter	5 – 10 franchises	up to 600	up to 600	£0 – £25
Growing	50 – 80 franchises	up to 4,800	up to 4,800	£100 – £180
Corporate	250 – 500 franchises	up to 30,000	up to 30,000	£450 – £700
Enterprise	1,000+ franchises	60,000+	60,000+	From £1,400

"Monthly cost" is the cost of the computer servers and database that Quick Wing runs on — paid by Quick Wing, not by your franchises.

100%

DATA ISOLATION PER FRANCHISE

99.9%

UPTIME TARGET

24/7

MONITORING & BACKUPS

What "scaling up" actually means

- **More franchises sign up?** We move you to a bigger database — no change for users.
- **Busier hours?** We add more web servers behind the scenes — no change for users.
- **Need faster reports?** We pre-build them overnight so they open instantly.
- None of this requires re-training your staff or changing how you use the app.

Why corporate buyers trust the design

- **Each franchise sees only its own data** — staff, vehicles, bookings.
- **Central head office view** across every franchise — for compliance & reports.
- **Daily backups** with one-click disaster recovery.
- **Full activity log** — every booking, edit and login is auditable.

WHAT THIS MEANS FOR YOUR CORPORATE ROLL-OUT

Start with 5–10 franchises today on the Starter setup at almost no infrastructure cost. As you sign more locations, Quick Wing seamlessly moves up the levels above — your franchise managers and staff notice nothing except faster performance. There is **no upper limit**: with sharding (splitting the database across many computers) Quick Wing can support tens of thousands of franchises on the same product you use today.
